Innovate for the Mission Ahead

Capability Statement

Core Services

- **Program & Acquisition Management**
- **Cybersecurity & Risk Management**
- **Financial Management & Internal Control**
- **Data Analytics & Visualization**
- **Intelligence & Analysis**
- **Digital Transformation & Cloud Modernization**

Industry Experience

Transportation Security Administration (TSA): Complex data analytics, data and risk analyses and visualizations, data management, and risk program communications and presentations. Developed DHS Award winning structured, repeatable, and transparent analytical processes to prioritize mission essential capabilities and gaps in operational processes and developed courses of actions to close gaps.

U.S. Coast Guard (USCG): Program management, information assurance, cybersecurity, and cloud modernization support for the Assistant Commandant for Intelligence and the C5ISC Intelligence Systems Product Line (ISPL).

Health and Human Services (HHS): Strategic analysis and vision to the HHS CFO for audit readiness and remediation and to the OASH CIO for information security policy support.

United States Navy (USN) LOG IT: Integration of common capabilities, data, and supporting service offerings for the USN's 200 Logistics IT systems into an end-to-end system of services.

DHS Countering Weapons of Mass Destruction (CWMD): Quick turn and in-depth assessments and analysis of CBRN threats. Gap analysis and mapping of CBRN architectures creating operational views and capabilities-based and stochastic analysis to inform the "planning" stage of the DHS Planning, Programming, Budgeting and Execution (PPBE) process.

U.S. Secret Service (USSS): Financial management & internal control support for multiple in house and third-party financial systems that process over $4B/year.

Federal Protective Service (FPS): Mission support and programmatic analyses.

- Technical and Engineering

Core Services

TSTC | Total Systems Technologies Corporation

Program & Acquisition Management

TSTC improves program/project management, quality, security, cost-effectiveness and efficiencies, and performance using our proven management frameworks, knowledge, and staff experience. Our agile, robust, and defendable full lifecycle Program and Acquisition Management approaches are highly tailorable and scalable; but more importantly, are defendable, which ensures that all of the I's are dotted and T's are crossed for completeness and compliance.

Financial Management & Internal Control

TSTC works with clients throughout all facets of financial management and internal controls – from establishing and managing audit readiness, to defining internal controls and conducting assessments, to establishing and improving ERM. TSTC provides practical solutions and mitigation strategies that reduce risk and negative impacts, enhance transparency, promote accountability, and improve data and risk-based decision making and regulatory compliance.

Cybersecurity & Risk Management

TSTC provides full life-cycle security, risk management, and security operations for classified and unclassified environments: on-prem, cloud, multi-cloud, and hybrid. Our certified professionals enhance security policies and integrate new architectures and approaches like Zero Trust and DevSecOps. We provide operational security and privacy support; perform assessments to identify vulnerabilities and mitigation – making systems more resilient to threats.

Intelligence & Analysis

TSTC assists IC and Federal Law Enforcement clients to integrate multi-source intelligence into operations with SLTT, federal, and private sector partners -- enhancing the ability to identify, mitigate, and better respond to current and emerging threats. We provide infrastructure, data management, analytic tools, and expertise in areas like Counterintelligence, Counterterrorism, Cybersecurity, Economic/Financial Security, and Transnational Organized Crime.

Data Analytics & Visualization

TSTC provides data analytics and visualization services so that clients can effectively use existing and new data sources to meet the growing challenges of global risk and dynamic technological innovation and defendable decision making. We use and integrate tools like Microsoft Excel and Power BI, Google Charts, Data Wrapper, Infogram, QlikView, Tableau, IBM Watson, Zoho Analytics, and other AI / ML solutions.

Digital Transformation & Cloud Modernization

TSTC helps clients incorporate digital technology across all areas of their organization to enable the continual and rapid innovation required to meet evolving mission goals and objectives. Our cloud modernization services help clients consolidate and migrate disparate on premises systems to data centric cloud-based and technology-driven solutions to include hybrid DasS, IaaS, PaaS, and SaaS deployment models spanning multiple security domains.

What are our clients saying?

"TSTC demonstrated exemplary flexibility and commitment to excellence in completing TSSRA per schedule when tasked with making several unplanned methodology changes" – TSA

"Overall TSTC is a great vendor to have on the CG team. They are a high-speed, well-versed organization with Coast Guard and CG Intel requirements. TSTC understands customer needs and do a great job with ensuring communication is effective. They look for ways to improve processes, supporting technological growth and development." - USCG
